

# AI CHAMPION IMPLEMENTATION LAB

Build the use case.  
Build the capability.

DEFINE / PROVE / IMPLEMENT

## THE CHALLENGE

AI Champions need more than enthusiasm and tool knowledge. They must translate a business problem into a viable use case, work across functions, define what needs to be proven and present a credible implementation recommendation.

## PROGRAMME OBJECTIVE

Develop the practical capability to take a business problem through use-case definition, workflow design, requirements, proof and implementation planning.

## WHO IT IS FOR

Internal AI Champions, Digital Champions, Business Analysts, Process Owners, Innovation Leads and Transformation Executives responsible for progressing real AI initiatives.

Participants must bring one real business process or AI use case.

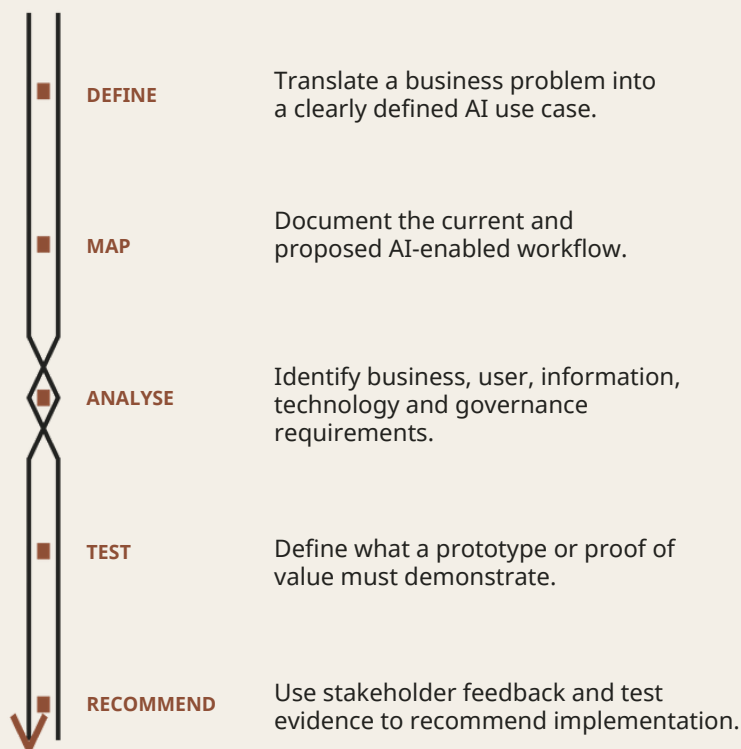

## LEARNING APPROACH

**20%  
CONCEPTS**

**80% APPLIED  
WORK**

Delivered across four to six sessions with workplace application between sessions.

## LEARNING OUTCOMES

## PARTICIPANT OUTPUTS

TNA and use-case readiness assessment required before participation.

## PROGRAMME PRINCIPLE

The first AI implementation should build the use case — and the capability for the next one.

## REQUEST A READINESS ASSESSMENT
